

Do you distribute information to the community?

Is it drafted to accommodate the average person's literacy levels?

Is it accessible for people with a 'print disability'?

Make your documents accessible to people with a disability!

Do you need help to make your documents, flyers and marketing materials accessible for everyone? **Deb Whitecross Enterprises has a 2 hour 'Accessible Information' workshop to help you!**

What is 'accessible' information?

Accessible information has content that is easy to read and understand for everyone.

Why do we need to make information accessible?

Some people may not be able to understand some written information and it helps ALL people understand your message.

Did you know?

Literacy statistics indicate the comprehension level in the average community is equivalent to the level between years 6-8. Therefore, it is important to provide information for the public in a level no greater than for an 8th grader. This workshop will show you how to make information accessible for everyone including people with a vision impairment.

Who is this workshop for?

This workshop is for any person or team that produces any documents, brochures, flyers, web content or marketing materials for the public.
